2005-2011
LVIV POLY TECHNIC
NATIONAL UNIVERSITY
Department of Information
Security

HOBBIES

Software development,
graphic design,
photography, video
montage,
cycling, traveling, hiking

I am looking for new opportunities for professional growth and improvement of my hard and soft skills. I have successful work experience both in a team and independently, a creative approach to tasks, and emotional resistance to critical situations. I also have good problem-solving and analytical skills. I constantly learn something new and strive for self-development.

PROJECTS

- As a part of the React course, I developed a headphones store with the "Basket" and "Favorite" functionality. The site data is stored in JSON format on the MockAPI service.
slavikpetruk.github.io/HeadphonesStore/
- As a part of a responsive web design training course, I created a mobile version of a Fast Food ordering website with user authentication implemented using Firebase Auth which enables logging using GitHub accounts. The website includes ordering components and an admin panel. The site data is stored in Google Firebase.
create-react-app-burgers.web.app/
- As a part of the React JS fundamentals course, I created a website for managing a database of articles stored on a JSON server.
postsarchive.web.app/

WORK EXPERIENCE

- 2016 – now.
Self-employed
I own and manage several channels on the YouTube platform with more than half a million subscribers on one of the channels.
- 2015
System administrator of a travel agency website
I worked on SEO optimization and website content development (HTML, CSS).
- 2008-2015
Graphic designer in a photo studio
I worked on designing various photo products and related photo processing.

COURSES

- Udemy / Jonas Schmedtmann - The Complete JavaScript Course
- JS/React related online courses/tutorialsstore.
